Active Vision The Psychology Of

But human vision is a dynamic process during which the eyes continually sample the environment. Where most books on vision consider it as a passive activity, this book focuses on vision as an 'active' process. It goes beyond most accounts of vision where the focus is on seeing, to provide an account of seeing AND looking.

Controlled active vision can be defined as a controlled motion of a vision sensor can maximize the performance of any robotic algorithm that involves a moving vision sensor. It is a hybrid of control theory and conventional vision. An application of this framework is real-time robotic servoing around static or moving arbitrary 3-D objects.

Active vision - Wikipedia

In the Active Vision Lab we study how vision is used to provide the information we need to complete our activities of everyday life. Two key questions if we are to understand how vision supports behaviour are where we look and what we encode and retain from the places that we look at.

Psychology of Vision | Friends Helping Friends

When a leader's appeal rests on a vision alone, leadership is not whole. And the limitations of such visionary leadership become painfully obvious in times of crisis, uncertainty, or radical change.
