Biologically, an adult is an organism that has reached sexual maturity. In human context, the term adult has meanings associated with social and legal concepts. In contrast to a "minor", a legal adult is a person who has attained the age of majority and is therefore regarded as independent, self-sufficient, and responsible. The typical age of attaining legal adulthood is 18, although definition ...

### Adult - Wikipedia

Alcoholism is, broadly, any drinking of alcohol that results in significant mental or physical health problems. Because there is disagreement on the definition of the word alcoholism, it is not a recognized diagnostic entity. Predominant diagnostic classifications are alcohol use disorder or alcohol dependence (); these are defined in their respective sources.

### Alcoholism - Wikipedia

However, these children and young adults also show risk for other indicators of alcohol and drug involvement. Specifically, children of alcoholics initiate substance use earlier and increase their rates of use more quickly [10,62].

### Understanding the Diverse Needs of Children whose Parents ...

Drug addiction, also called substance dependence or dependence syndrome, is a condition where a person feels a strong need to take a drug. Addiction also involves other behaviours. These include finding it difficult to control the need to use the drug and feeling the use of the drug to be more important than more normal things such as family or work.
