The control informally moved from W3C to WHATWG when it became clear that the W3C push towards XHTML was not a good idea. If you've never heard of XHTML, here's a short story. In the early 2000s, we all believed the future of the Web was XML (seriously). So HTML moved from being an SGML-based authoring language to an XML markup language.

The HTML Handbook - freeCodeCamp.org

HTML is where the magic of web page design begins. It isn't presentational — that's what CSS is for — HyperText Markup Language is a simple, elegant way to structure content. These tutorials use HTML5. You might have heard of it. It's a cool buzzword that kids use in the playground.
