BILLION DOLLAR LUNGS Asbestos, Mesothelioma, Cancer and ...

A Missouri appeals court upheld a multi-billion-dollar verdict in a Johnson & Johnson case tied to a group of women's asbestos-caused ovarian cancer. The New York Times reported that the court reduced the original judgment of \$4.69 billion to \$2.12 billion. The court's decision should be uplifting news for people with mesothelioma, another cancer caused by asbestos.

Belluck & Fox, LLP Mesothelioma Cancer & Asbestos Attorneys

Lung cancer is most common, but aggressive mesothelioma is also a possibility. Another condition that may develop after asbestos exposure is asbestosis. Asbestosis occurs in individuals who have inhaled asbestos dust. As the body attempts to remove the asbestos dust from the lungs, scar tissue forms, which can make breathing painful or difficult.

Asbestosis | Symptoms, Diagnosis, Treatment, and Prognosis

Symptoms or signs of mesothelioma may not appear until 20 to 50 years (or more) after exposure to asbestos. Shortness of breath, cough, and pain in the chest due to an accumulation of fluid in the pleural space (pleural effusion) are often symptoms of pleural mesothelioma. Mesothelioma that affects the pleura can cause these signs and symptoms:

Mesothelioma - Wikipedia

Mesothelioma is a malignant tumor that results from inhaled asbestos fibers. It forms in the lining of the abdomen, lungs, or even the heart. However, even though treatments are available because mesothelioma is an aggressive and deadly form of cancer.
