Allplan - BIM - CAD - 3D Software

It is used to transfer data and documents created during design and construction to the end users or facility managers. It differs from IFC in that it helps professionals to understand and share BIM data by holding data in a human readable form, whereas IFC helps different software to understand and share BIM data.

File formats for BIM - Designing Buildings Wiki

It can be conducted remotely or on-site at a customer's facility. Day 1: Introduction to BIM and GIS Integration provides an overview of the business, integration patterns, and technologies. Day 2: Hands-On Integration Techniques allows participants to use the software and integration workflows discussed on Day 1.

Getting Real with BIM and GIS Integration

We have improved the way we handle properties for models loaded from Model Coordination in Navisworks 2022 and Navisworks 2021 Update 2. If you could try updating to one of those versions, hopefully that should improve things (note that if you upgrade to Navisworks 2021 Update 2, you will have to explicitly check the "Convert Properties" option in the Global Options -> File Loaders -> SVF ...
