CAMPBELL BIOLOGY - Pearson

Biology is the scientific study of life. It is a natural science with a broad scope but has several unifying themes that tie it together as a single, coherent field. For instance, all organisms are made up of cells that process hereditary information encoded in genes, which can be transmitted to future generations. Another major theme is evolution, which explains the unity and diversity of life.

Biology - Wikipedia

Chairs: Oleh Khalimonchuk, University of Nebraska–Lincoln, and Laura Lackner, Northwestern University. The goal of this interest group is to build a community for researchers in the field of mitochondria. This interest group event will promote cross-talk across the areas of basic mitochondrial biology and molecular mechanisms of disease and aging, and provide an opportunity for biomedical ...
