Edmund Lai PhD, BEng, in Practical Digital Signal Processing, 2003. 1.4.2.1 Image enhancement. Image enhancement is used when we need to focus or pick out some important features of an image. For example, we may want to sharpen the image to bring out details such as a car license plate number or some areas of an X-ray film. In aerial photographs, the edges or lines may need to be enhanced in ...

The designers are constantly challenged to improve the performance of an electronic product. At the same time, the designers need to consider the effects of high-speed signals in a PCB design since continuously increasing clock frequencies and decreasing rise times may lead to signal integrity issues. This requires higher frequencies to be used, and frequencies of 50MHz to 3GHz have become very ...
