BMW 3 Series (E30) - Wikipedia

The BMW light control module, commonly known as the LCM, lamp control module, or light check module, is an extremely common part that fails on the BMW E38 and E39. What is it, how does it work, and why does it fail? Once upon a time, a light switch in a car simply completed a circuit between the battery and a bulb, or sometimes the battery to a relay which activated the battery/bulb circuit.

What Is A BMW Light Control Module (LCM)? - FCP Euro

I had BMW m3 e93 and 335 f30, usually I bought car from auction and fix it by myself, but now I am looking for g11 from 2016 to 2018, looks like this generation 7 series use the new engine B58, I heard all good about this...

BimmerFest BMW Forum

First featured in the E39 5-series in 1995, the DISA valve survived until the retirement of the M54 engine in 2006. Across its 11-year life, the valve was used in the M50, M52, and M54 engine which were predominantly used in the E36/E46 3-series, E39/E60 5-series, and a number of the X3, X5, Z3, and Z4 models.
