This solidly constructed work concludes with some overly simple assertions: 'Strategic bombing does not matter,' 'Punishment does not work,' and the like. Exploring a large number of cases superficially and five cases in depth, the author builds a strenuous argument that strategic air power has never delivered on its promises and, for reasons intrinsic to strategy, cannot.

Bombing to Win. Pape published his first full-length book in 1996, Bombing to Win: Air Power and Coercion in War, where he questions the conventional wisdom that coercive air power is both effective and relatively cheap. Rather than coercing citizens of the bombed nation to rise up against their government, coercive air power often backfires, resulting in a citizenry that is both surprisingly resilient and loyal to their government.

Robert Pape - Wikipedia

The air power that defeated Iraq was not the bombing of Baghdad that captivated millions of CNN viewers, but the direct pounding of the Iraqi army in Kuwait, which denied Saddam a chance to inflict heavy costs on the coalition ground offensive. U.S. air power made it impossible for the Iraqis to stop a breakthrough at the front.

The True Worth of Air Power | Foreign Affairs

- Strat. bombing only matters in long wars of attrition decided by material superiority - Theater air power combined with ground power is stronger coercive tool (PGMs better used for this) - Should focus on destroying enemy armies from air- obviously contradicts Warden. - Threats to civilians wasteful & immoral

Strategic bombing is a military strategy used in total war with the goal of defeating the enemy by destroying its morale, its economic ability to produce and transport materiel to the theatres of military operations, or both. It is a systematically organized and executed attack from the air which can utilize strategic bombers, long- or medium-range missiles, or nuclear-armed fighter-bomber aircraft to attack targets deemed vital to the enemy's war-making capability. One of the strategies of war
