Liquid Extraction

Extraction

Objectives For Lie

Liquid is one of the four primary states of matter, with the others being solid, gas and plasma. A liquid is a fluid. Unlike a solid, the molecules in a liquid have a much greater freedom to move. The forces that bind the molecules together in a solid are only temporary in a liquid, allowing a liquid to flow while a solid remains

The aim of the juice extraction process (see Figure 5.4) is to obtain as much juice from the fruit as possible while preventing rag, oil and other fruit components from entering the juice. These may lead to bitterness in taste or other defects during subsequent juice storage. The extraction operation determines product quality and
