This results in exceptional strength. 12 full-length extruded stringers help stiffen the skin against torsion and shear loads. The wing is joined to the fuselage by extra heavy fail-safe 2024-T3 aluminum fittings. A single streamlined, custom extruded strut is used for high strength and low drag. Wing tips are gelcoated fibreglass.

× The following article was originally penned by a deliberately anonymous Kiwi 185 pilot and circulated around the community in PDF form. It is full of some gems of knowledge, born of experience in the type. Some details, as expected, are contended in discussion. Some language is clearly vernacular of the southern hemisphere.

A Cowboy's Guide to the Cessna 185 - Backcountry Pilot

The Supermarine Spitfire is a British single-seat fighter aircraft that was used by the Royal Air Force and other Allied countries before, during, and after World War II. Many variants of the Spitfire were built, using several wing configurations. It was also the only British fighter produced continuously throughout the war.
