The Strength Model of Self-Control - Roy F. Baumeister ...

Roy Baumeister. As a widely studied theory, SRT was also greatly impacted by the well-known social psychologist Roy Baumeister. He described the ability to self-regulate as limited in capacity and through this he coined the term ego depletion.

Self-regulation theory - Wikipedia

Baumeister and his colleagues (e.g., Baumeister, 1993; Baumeister, Smart, & Boden, 1996) found that behaviors and outcomes are often more variable for people high in self-esteem than for people low in self-esteem. For example, studies often fail to yield a significant correlation between aggression or violence and self-esteem, in part because ...

Does High Self-Esteem Cause Better Performance ...

A hypothesized need to form and maintain strong, stable interpersonal relationships is evaluated in light of the empirical literature. The need is for frequent, nonaversive interactions within an ongoing relational bond. Consistent with the belongingness hypothesis, people form social attachments re ...

June P Tangney 1 , Roy F Baumeister, Angie Luzio Boone Affiliation 1 Department of Psychology, Case Western Reserve University, 4400 University Drive, Fairfax, VA 22030-4444, USA.

High self-control predicts good adjustment, less pathology ...

Early experimental evidence. American social psychologist Roy Baumeister and his colleagues proposed a model that described self-control like a muscle, which can become both strengthened and fatigued. The researches proposed that initial use of the “muscle” of self-control could cause a decrease in strength, or ego depletion, for subsequent tasks.
