The Carver C-1 continues to be my go to preamp. I've let go of various pres (tube and solid state) because they did not match my modded Carver C-1. Yes, it has been modded to the BillD Mod specs, which I did myself. I guess that's why I love it so much too.

Another Carver product (an ideal companion to the C-1, though not related to it) is the M-500 Magnetic Field power amplifier. Employing the same basic design as the cube-shaped M-400 amplifier, it is styled more conventionally, with a front panel 17-3/8 inches wide, 4-1/4 inches high, and 13-1/2 inches deep.

### Carver C-2 High Performance Console Preamp Manual ...

The Carver C-1 preamp has every feature you can ask for in a preamp and it's built so well that it's still running perfectly clean after 30+ years of partial use and storage. If you want a really clean analog preamp that can be completely up-graded with new resistors, caps, and Op-Amps then spending about \$300 to pick up a mint C-1 is well worth the investment.

### Carver C-1 Sonic Holography Preamp Manual Works Great ...

Saw a Carver C-1 in CL for \$90, bought it. Externally, it looks like manna from heaven, it has a couple of tape loops, dual phono inputs with switchable loading,loudness, seperate bass and treble for each channel, a lot (??) a/c outlets on the back, including a switched one for 1000w so I can hook up the triggerless Haffler to it and it will turn on when the preamp is turned on.

### My Carver C-1 review - Tapeheads Tape, Audio and Music Forums

Hi, I own two Carver C-1 preamps that are both in mint condition. I have read in the manual that one set of the pre-outs can have the resistor values changed to attenuate the preamps output. It's a very clean preamp that's also great sounding. I have been using some 12DB attenuators to allow an increase in volume of the C-1.
