Sensation and perception are two separate processes that are very closely related. Sensation is input about the physical world obtained by our sensory receptors, and perception is the process by which the brain selects, organizes, and interprets these sensations. In other words, senses are the physiological basis of perception.

## **Sensation and Perception | Introduction to Psychology**

Sensation is a function of the low level, biochemical, and neurological mechanisms that allow the receptor cells of a sensory organ to detect an environmental stimulus. Hi everyone, I know it's been a bit of a drought between novels lately, for numerous reasons that I'll explain later. However, I'm glad to announce that this week, we have released Become a Star and Return of the Disaster-Class Hero!The drought is over, and there will be a veritable downpour of novels coming in 2022, more than in any two years combined in Wuxiaworld's history.
