"A" represents the central atom and n represents the number of bonds with the central atom. When lone pairs are present, the letter E x is added. The x represents the number of lone pairs present in the molecule. For example, a molecule with two bond pairs and two lone pairs would have this notation: AX 2 E 2.

Interesting Facts about the Ninth Amendment. It is sometimes referred to as Amendment IX. This amendment is sometimes used to stop the government from expanding its powers beyond those listed in the Constitution. Judge Robert Bork called the Ninth Amendment a "meaningless inkblot" on the Constitution.

US Government for Kids: Ninth Amendment

Science Olympiad is an American team competition in which students compete in 23 events pertaining to various fields of science, including earth science, biology, chemistry, physics, and engineering. Over 7,800 middle school and high school teams from 50 U.S. states compete each year. U.S. territories do not compete; however, since 2012 high school teams from Japan have competed at the ...

Africa has the world's oldest record of human technological achievement: the oldest stone tools in the world have been found in eastern Africa, and later evidence for tool production by our hominin ancestors has been found across West, Central, Eastern and Southern Africa. The history of science and technology in Africa since then has, however, received relatively little attention compared to ...
