First, notice I copy and paste a formula that contains structured references, column names won't change. For example, if I add a new column to the end of this table, then copy and paste the tax formula into the new column, Excel brings in the same formula without changes. This is true even if I copy and paste outside the table.

The standard way to copy a formula exactly is to copy the formula as text, and then paste. To do this, first put the cell in Edit mode. Next, select the entire formula and copy it to the clipboard. Use Escape to get out of Edit mode. Now, if we move to another location on the worksheet and paste, we'll get an exact copy of the original formula.
