Cormen Algorithms Solutions

Welcome to my page of solutions to "Introduction to Algorithms" by Cormen, Leiserson, Rivest, and Stein. It was typeset using the LaTeX language, with most diagrams done using Tikz. It is nearly complete (and over 500 pages total!), there were a few problems that proved some combination of more difficult and less interesting on the initial ...

Chapter 1 (The Role of Algorithms in Computing) 1.1 (Algorithms) Exercise 1.1-1 (sorting, optimally multiply matrices, and convex hulls) Sorting is done in all sorts of computational problems. It is especially helpful with regard to keeping data in a understood ordering so that other algorithms can then work easily

The pseudo-code of TVI is shown in Algorithm 2. We first apply Kosaraju's algorithm (Cormen, Leiserson, Rivest, & Stein, 2001) to find the set of strongly connected components (SCCs, or metastates) in the causality graph GR , and its topological order. ($id[s]$ indicates the topological order of the SCC that state s belongs to.)
