Internal resistance is measured in Ohms. The relationship between internal resistance ( $r$ ) and emf ( $e$ ) of cell s given by.  $e = I (r + R)$  Where,  $e = \text{EMF}$  i.e. electromotive force (Volts),  $I = \text{current (A)}$ ,  $R = \text{Load resistance}$ , and  $r$  is the internal resistance of cell measured in ohms. On rearranging the above equation we get;  $e = IR + Ir$  or,  $e = V +$
