Gökhan, In PowerPivot, each cell in the table is calculated individually, including total rows. Totals are *not* a sum of the detail rows like in a traditional PivotTable. The formulas are calculated -every single cell. The total you want is like a weighted average, and PowerPivot gives you a normal average.

DAX - Subtotals and Grand Totals That Add Up “Correctly” - P3

DAX stands for D ata A nalysis E x pression. It is a special language we use to create measures in Power Pivot. Although it is a special language, it looks exactly like our regular Excel formulas. That means you can easily learn the DAX basics and create measures in no time.
