Java Forums at The Big Moose Saloon Mosey on in and pull up a stool. These discussion forums are the heart and soul of our Java community. Our bartenders keep the peace, and folks are pretty friendly anyways, so don't be shy! MORE FORUMS > Top posts.

JavaRanch - A friendly Place for Java Greenhorns

Method overriding, in object-oriented programming, is a language feature that allows a subclass or child class to provide a specific implementation of a method that is already provided by one of its superclasses or parent classes. The implementation in the subclass overrides (replaces) the implementation in the superclass by providing a method that has same name, same parameters or signature ...
