A supercapacitor (SC), also called an ultracapacitor, is a high-capacity capacitor with a capacitance value much higher than other capacitors, but with lower voltage limits, that bridges the gap between electrolytic capacitors and rechargeable batteries. It typically stores 10 to 100 times more energy per unit volume or mass than electrolytic capacitors, can accept and deliver charge much ...

The new 2.5 th generation (2.5G) 600V SJ MOSFETs were developed using new designs based on the latest process technology to improve switching functionality by more than 10% compared to previous generations. As a result, Magnachip has achieved lower switching loss and better power efficiency. For applications requiring high Electrostatic Discharge (ESD) ruggedness, a Zener diode is embedded ...

Episodic memory is, at first glance, the more 'human' of the two, the memory of people, feelings and places that makes us who we are. Semantic memory seems colder, more robotic. More Mr Spock than Dr McCoy. Yet it is our amazing ability to store culturally acquired learning in our semantic memory that makes us so successful as a species.

The Pix2Pix Generative Adversarial Network, or GAN, is an approach to training a deep convolutional neural network for image-to-image translation tasks. The careful configuration of architecture as a type of image-conditional GAN allows for both the generation of large images compared to prior GAN models (e.g. such as 256x256 pixels) and the capability of performing well on a variety of different
