Diagnosis And Treatment Of Pain

Treatment. Most back pain gets better within a month of home treatment. However, everyone is different, and back pain is a complex condition. For many, the pain doesn't go away for a few months, but only a few have persistent, severe pain. Over-the-counter pain relievers and the use of heat might be all you need. Bed rest isn't recommended.

Low back pain is a considerable health problem in all developed countries and is most commonly treated in primary healthcare settings. It is usually defined as pain, muscle tension, or stiffness localised below the costal margin and above the inferior gluteal folds, with or without leg pain (sciatica). The most important symptoms of non-specific low back pain are pain and disability.

Diagnosis and treatment of low back pain | The BMJ

Pain is a distressing feeling often caused by intense or damaging stimuli. The International Association for the Study of Pain defines pain as "an unpleasant sensory and emotional experience associated with, or resembling that associated with, actual or potential tissue damage." In medical diagnosis, pain is regarded as a symptom of an underlying condition.
