These materials consist of homework problem solutions, project solutions, MATLAB functions, and image databases.

DIP4E Support Materials - Digital Image Processing

Digital image processing is the use of a digital computer to process digital images through an algorithm. As a subcategory or field of digital signal processing, digital image processing has many advantages over analog image processing. It allows a much wider range of algorithms to be applied to the input data and can avoid problems such as the build-up of noise and distortion during processing.
