OEM Tire Sizes – RAM Lug Nut Patterns. One thing that is pretty helpful to know when looking for tires is the lug nut pattern can tell you whether or not your truck and/or rim is setup for a 2wd or 4wd. The rule of thumb is that 6 lug patterns (wheels with 6 lug nuts) are for 4wd and 5 lug patterns are more common for 2wd. Going Bigger ...

Slipper springs can support between 500 and 11,200 lbs per spring (1,000 to 22,400-lb axles). Each spring carries 50% of the axle's weight rating. Ex: if your axle capacity is 3,500 lbs, each spring should be rated for 1,750 lbs. Note that the overall spring weight rating should not be greater than the trailer's weight capacity. If it is, this ...

I used this to set the bearing preload on my 2007 Dodge RAM2500. As others have commented about this socket, it is much cheaper than other sockets for servicing American Axle rear axles on RAM2500/3500. You do need to spend a few minutes first grinding down the backside of the fingers to make them rounded, so they will fit the bearing adjuster nut.
