Walter Nicholson is the Ward H. Patton Professor of Economics at Amherst College. He received his B.A. in mathematics from Williams College and his Ph.D. in economics from MIT. Professor Nicholson's principal research interests are in the econometric analyses of labor market problems including unemployment, job training, and the impact of inter-

Microeconomic Theory: Basic Principles and Extensions

The eighth and tenth terms of the sequence are a_8 and a_{10} , where a_1 is the first term and d is the common difference. We can find the common difference by subtracting the tenth and eighth terms and solving for d : Now set eighth term equal to 87, set $a_1 = 1$, and solve:

How to find the nth term of an arithmetic sequence - Algebra 1

Green economists and economics. Green economics is loosely defined as any theory of economics by which an economy is considered to be component of the ecosystem in which it resides (after Lynn Margulis). A holistic approach to the subject is typical, such that economic ideas are commingled with any number of other subjects, depending on the particular theorist.

Green economy - Wikipedia

Economics is haunted by more fallacies than any other study known to man. This is no accident. The inherent difficulties of the subject would be great enough in any case, but they are multiplied a thousand fold by a factor that is insignificant in, say, physics, mathematics or medicine—the special pleading of selfish interests.

Economics in One Lesson - Foundation for Economic Education

After earning a Ph.D. in economics from MIT, he began teaching at Harvard in 1985 and was promoted to full professor in 1987. At Harvard, he has taught both undergraduate and graduate courses in macroeconomics. He is also author of the best-selling introductory textbook Principles of Economics (Cengage Learning).

In economics, demand is the quantity of a good that consumers are willing and able to purchase at various prices during a given period of time. The relationship between price and quantity demanded is also called the demand curve. Demand for a specific item is a function of an item's perceived necessity, price, perceived quality, convenience, available alternatives, purchasers' disposable income ...

Descriptive decision theory is concerned with characterising and explaining regularities in the choices that people are disposed to make. It is standardly distinguished from a parallel enterprise, normative decision theory, which seeks to provide an account of the choices that people ought to be disposed to make. Much of the work in this area has been devoted to the building and testing of ...
