Emotion Theory and Research: Highlights, Unanswered ...

Emotions, both basic and complex, play a huge role in how we live our lives, our physical health and our interpersonal relationships. “Emotions change how we see the world and how we interpret the actions of others.” – Paul Ekman, “Emotions Revealed: Recognizing Faces and Feelings to Improve Communication and Emotional Life”

Our Basic Emotions Infographic | List of Human Emotions ...

This hypothesis holds that the adaptive value of recognizing individuals with diseases or bad genes has prepared us to respond to facial qualities that can mark low fitness (Zebrowitz, Fellous, Mignault, & Andreoletti, 2003; Zebrowitz & Rhodes, 2004). Our responses are then overgeneralized to normal individuals whose faces resemble those who ...

Social Psychological Face Perception: Why Appearance Matters

Emotions coordinate our behavior and physiological states during survival-salient events and pleasurable interactions. Even though we are often consciously aware of our current emotional state, such as anger or happiness, the mechanisms giving rise to these subjective sensations have remained unresolved. Here we used a topographical self-report tool to reveal that different emotional states ...

Bodily maps of emotions | PNAS

Many emotions experts, including Dr. Paul Ekman, disagree with this stance, noting that surprise feels like an emotion to most people; in the moment or two before we figure out what is occurring, before we switch to another emotion or no emotion, surprise itself can feel good or bad.

What is Surprise? | Surprise Emotion | Paul Ekman Group

The least researched of the seven universal emotions, contempt is the feeling of dislike for and

Facial perception is an individual's understanding and interpretation of the face. Here, perception implies the presence of consciousness and hence excludes automated facial recognition systems. Although facial recognition is found in other species, this article focuses on facial perception in humans.. The perception of facial features is an important part of social cognition.

Face perception - Wikipedia

Wearing face masks is one of the essential means to prevent the transmission of certain respiratory diseases such as coronavirus disease 2019 (COVID-19). Although acceptance of such masks is increasing in the Western hemisphere, many people feel that social interaction is affected by wearing a mask. In the present experiment, we tested the impact of face masks on the readability of emotions.

Frontiers | Wearing Face Masks Strongly Confuses ...

Emotions are more likely to be caused by a specific event, and emotions are more fleeting than moods. Emotions are reactions to a person, whereas moods are not usually directed at a person or an event. Unlike moods, emotions like anger and disgust tend to be more clearly revealed by facial expressions.

Ch. 4 Emotions and Moods Flashcards | Quizlet

Thus there is strong evidence for the universal facial expressions of seven emotions – anger, contempt, disgust, fear, joy, sadness, and surprise (see Figure 1). Figure 1: The Seven Basic

Yes, dogs can 'catch' their owners' emotions

Emotion is defined as any mental experience with high intensity and high hedonic content. The existence and nature of emotions in animals are believed to be correlated with those of humans and to have evolved from the same mechanisms. Charles Darwin was one of the first scientists to write about the subject, and his observational (and sometimes anecdotal) approach has since developed into a ...
