The ethics of artificial intelligence is the branch of the ethics of technology specific to artificially intelligent systems. It is sometimes divided into a concern with the moral behavior of humans as they design, make, use and treat artificially intelligent systems, and a concern with the behavior of machines, in machine ethics. It also includes the issue of a possible singularity due to ...

Virtue ethics is currently one of three major approaches in normative ethics. It may, initially, be identified as the one that emphasizes the virtues, or moral character, in contrast to the approach that emphasizes duties or rules (deontology) or that emphasizes the consequences of actions (consequentialism).

Many accounts of informed consent in medical ethics claim that it is valuable because it supports individual autonomy. Unfortunately there are many distinct conceptions of individual autonomy, and their ethical importance varies. A better reason for taking informed consent seriously is that it provides assurance that patients and others are neither deceived nor coerced.

Feminist Ethics aims "to understand, criticize, and correct" how gender operates within our moral beliefs and practices (Lindemann 2005, 11) and our methodological approaches to ethical theory. More specifically, feminist ethicists aim to understand, criticize, and correct: (1) the binary view of gender, (2) the privilege historically available to men, and/or (3) the ways that views about ...

Care Ethics. The moral theory known as "the ethics of care" implies that there is moral significance in the fundamental elements of relationships and dependencies in human life. Normatively, care ethics seeks to maintain relationships by contextualizing and promoting the well-being of care-givers and care-receivers in a network of social relations.

Ethical issues are identified and framed through a "naturalized bioethics" approach, as recommended by Margaret Walker and her colleagues, Hilde Lindemann and Marian Verkerk. This approach critiques traditional bioethics and gives attention to everyday ethics and the social, economic, and political context within which ethical problems exist.
