Woodworking is depicted in many extant ancient Egyptian drawings, and a considerable amount of ancient Egyptian furniture (such as stools, chairs, tables, beds, chests) have been preserved. Tombs represent a large collection of these artifacts and the inner coffins found in the tombs were also made of wood.

A plate joiner (above) is used to cut the slots. Carpenter's glue swells the compressed wood biscuits, hence making a very tight, strong joint. The biscuits are a great reinforcement for butt joints used to join cabinet carcasses, chests and boxes, drawers and trays or end-to-edge joined frame members 2 inches and wider. Splines

How to Make and Assemble Butt Joints | Woodworking Joinery

Leg-and-rail construction is found on chairs, tables, benches, stools and on some furniture such as chests. Frame-and-panel construction is used to make up the component parts of many types of furniture including the sides, doors and interior web frames with dust panels that are used on many fine, hand-built pieces of furniture.

Furniture refers to movable objects intended to support various human activities such as seating (e.g., chairs, stools, and sofas), eating (), and sleeping (e.g., beds). Furniture is also used to hold objects at a convenient height for work (as horizontal surfaces above the ground, such as tables and desks), or to store things (e.g., cupboards and shelves).

It's also prized for fine furniture, clocks and specialty woodworking items. Birch is not used for flooring as much as maple. Because it's more affordable, birch is used more often as a structural or building material for crates, concealed furniture parts, knobs, handles, kitchen items, chests, veneer and plywood.
