Alumni Spotlight Statlab Mobile CEO and MSE alumni Bryan Wilson proves that there is rarely a straight line to success. Bryan Wilson's first brush with engineering came at a young age, and Statlab Mobile not only provided a chance to combine two of his passions - science and law - but also opportunities he wouldn't have dreamed of as a child who grew up loving to experiment.

Find the latent heat of fusion,  $L_f$ , according to  $L_f = q \div m$  by dividing the heat,  $q$ , absorbed by the ice, as determined in step 3, by the mass of ice,  $m$ , determined in step 4. In this case,  $L_f = q / m = 2293 \text{ J} \div 7.0 \text{ g} = 328 \text{ J/g}$ . Compare your experimental result to the accepted value of 333.5 J/g.

Spinal fusion is surgery to permanently connect two or more vertebrae in your spine, eliminating motion between them. Spinal fusion involves techniques designed to mimic the normal healing process of broken bones. During spinal fusion, your surgeon places bone or a bonelike material within the space between two spinal vertebrae.
