designing an entire farming system, can lead to more transformational change which is much harder to achieve. Environmental or ecological systems overlap with the food system, and they can be explored at different levels, from a single field, to a whole farm, to the local, regional, or global food system.

Chapter 1: Introduction to Food Systems

Community Supported Agriculture consists of a community of individuals who pledge support to a farm operation so that the farmland becomes, either legally or spiritually, the community's farm, with the growers and consumers providing mutual support and sharing the risks and benefits of food production. In a traditional CSA model...
