Free Energy is not even "real":  $G$  differs from the thermodynamic quantities  $H$  and  $S$  in another significant way: it has no physical reality as a property of matter, whereas  $H$  and  $S$  can be related to the quantity and distribution of energy in a collection of molecules (e.g., the third law of thermodynamics). The free energy is simply a useful ...

Chemistry is the scientific study of the properties and behavior of matter. It is a natural science that covers the elements that make up matter to the compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position ...
