Github Iliakan Javascript Tutorial En

If you have suggestions what to improve - please submit a GitHub issue or a pull request instead of commenting. If you can't understand something in the article - please elaborate. To insert few words of code, use the `<code>` tag, for several lines - wrap them in `<pre>` tag, for more than 10 lines - use a sandbox (plnkr , jsbin , codepen ...)

Async/await - The Modern JavaScript Tutorial

Promise.all takes an array of promises (it technically can be any iterable, but is usually an array) and returns a new promise.. The new promise resolves when all listed promises are resolved, and the array of their results becomes its result. For instance, the Promise.all below settles after 3 seconds, and then its result is an array [1, 2, 3]:
