Wikipedia

Metallurgical (met) coal (sometimes referred to as coking coal) is a naturally occurring sedimentary rock found within the Earth's crust.

Categories of met coal include hard coking coal, semi-hard coking-coal, semi-soft coking coal and pulverized coal for injection (PCI).

The mined coal is moved by truck to the coal handling and preparation plant (CHPP) located near the mine. The coal is then dumped into two hoppers in the CHPP. The coal goes through initial crushing at the base of the two hoppers. From there the product is transported by a conveyor to the crushing station.
