Aims. A nine-item observer rating scale, called the Therapist Empathy Scale (TES), was developed based on Watson's (1999) work to assess affective, cognitive, attitudinal, and attunement aspects of therapist empathy. The aim of this study was to evaluate the inter-rater reliability, internal consistency, and construct and criterion validity of the TES.

Development of the Therapist Empathy Scale

The development of the NCCN Guidelines is solely supported by membership dues from the NCCN Member Institutions, and industry support is not accepted for any direct costs associated with the development of the NCCN Guidelines. The pharmaceutical and biotechnology industry plays a major role in the field of cancer research and treatment.
