While the densities for hardwood and softwood pellets are the same, the key difference between the two is the British thermal unit (BTU) measurement. Softwood has a higher BTU output, meaning it burns hotter than hardwood pellets due to the higher concentration of lignins.

Hardwood Pellets vs Softwood Pellets | Energex

The reason a "zoomed out" view makes the long-term trend so clear is that Earth's annual average temperatures from year to year are found to be very stable when nothing is forcing it to change.Today, though, every decade since 1960 has been warmer than the last, and the last three decades each have been the warmest on record.
