Check if the connections are proper and then press the hazard button. All 4 side lights should blink together. once everything is set, use the insulation tape to cover up the new connection points made. It should look something closed to as shown in the image.

### How to Add Hazard Light With Switch for Scooter/bike : 4 ...

If you look at a hazard switch from one of these kits you will see its quite complex. It doesn't have just two terminals like most. It has to: Disconnect the flasher outputs from each side of the flasher switch and connect them together. Connect the hazard flasher to these two wires. Connect the built in lamp to this lot so it will flash.

### how to install hazard lighting? - Morris Minor Owners Club

combined brake/flasher lights. These original wiring diagrams have the wiring for Emergency 4 way flasher added. For this the available LUCAS Hazard Warning switch (7 Way Switch; 2 opening contacts, 5 closing contacts + separate Flasher Relay for 4 way flashing + Hazard Warning Light in knob of switch) is used. Features:

### Four Way Flasher

Step 1, Unpack your new fixture. Carefully lay out the parts so they are easily accessible. Step 2, Turn off the power. Find your home's circuit breaker or fuse box and turn off power to the room or area of the house where you'll be installing the light. [2] X Research source Failure to turn off the power before beginning work may result in serious electrical shock. Step 3, Remove the old fixture. Unless you are installing your pendant light in a new or recently remodeled house, you ...
