VBAT. This is the power that comes from the 'optional' LiPoly battery. It should be 3.0-3.7V or so, with variable current capability. If you are making a mainboard Feather you must have onboard LiPoly charging (its a core expectation) and the LiPo connection must be a JST 2-PH that matches Adafruit batteries. The connector must be in the same location, 0.425" from the left edge

Adventure games have strong storylines with significant dialog, and sometimes make effective use of recorded dialog or narration from voice actors. This genre of game is known for representing dialog as a conversation tree. Players are able to engage a non-player character by choosing a line of pre-written dialog from a menu, which triggers a response from the game character.

You can use several programming languages when developing Cocoa software, but the essential, required language is Objective-C. Objective-C is a superset of ANSI C that has been extended with certain syntactical and semantic features (derived from Smalltalk) to support object-oriented programming. The few added conventions are easy to learn and use. Because Objective-C rests on a foundation of ...
