1. Introduction. Bottom-up approaches based on self-assembly of colloidal particles to tailor nanostructures and materials with specific properties are particularly attractive because of the lower cost and time burden in comparison with top-down approaches based on serial nanofabrication techniques such as electron beam lithography, with the potential for large area and high scale fabrication.

A. Methodological Problems in the Study of Aging Skeletal Muscle. The study of sarcopenia in humans is complicated by the long duration of the aging process, large variability among individuals, and multiple factors affecting muscle that are not primarily related to aging per se. Studies of aging can be conducted using either a cross-sectional or longitudinal design, but neither are free from ...

The skin surface may resemble an orange peel (i.e., peau d'orange) because superficial cutaneous edema surrounds the hair follicles, which causes dimpling in the skin because they remain tethered to the underlying dermis. Vesicles, bullae, and cutaneous hemorrhage in the form of petechiae or ecchymoses may develop on the inflamed skin.
