Maerz Ofenbau AG - THE WORLD LEADER IN LIME KILNS

Safe use of kilns in schools and craft studios. Ceramic kilns are essentially simple and safe to use, provided that the proper controls and safety devices are fitted and that the safe method of working is fully understood. For proprietary kilns, the manufacturer's guidance on positioning and operation should be carefully followed.

Safe use of kilns in schools and craft studios

At Evenheat, design matters. We're constantly evaluating our design choices and construction techniques to produce the best possible products. Most Evenheat Kilns now also have the option of a Quiet Drive Solid State Relay System. Solid-state means there are no moving parts, nothing to wear out, and nothing to replace.

Clinker is the main ingredient in cement, and the amount used is directly proportional to the CO₂ emissions generated in cement manufacturing, due to both the combustion of fuels and the decomposition of limestone in the clinker production process.. From 2014 to 2018, the clinker-to-cement ratio increased at an average of 1.6% per year, reaching an estimated 0.70 in 2018; this rise was the ...
