Take ten minutes to watch an overview of From Cells to Organisms, from Issues and Science, developed by SEPUP. The first five minutes covers the unit's anchoring phenomenon, the unit issue, and a brief visit to each lesson, while the second half takes a deep dive into one activity. This is a great way to quickly see how SEPUP's new NGSS units are structured.

From Cells to Organisms | Lab Aids

The organisms in an ecosystem interact with one another, and with the abiotic factors of the environment, in various ways. Abiotic factors are the nonliving characteristics of the environment. Some examples of abiotic factors include temperature and rainfall. A desert ecosystem's abiotic factors include a small amount of rainfall, and warm daytime and cool night time temperatures.

Food Chain Virtual Lab environment.

Answer Lab Questions 1-17 below. Table 1 To complete the Table below, students should complete the following 4 steps. 1. List the organisms present in each ecosystem (i.e. hawks, snakes, etc.) under "Organisms Present:". 2. List the total number of organisms present at each trophic level in each Ecosystem under "Numbers:". 3.
