Yes, React is worth learning. There are a couple of reasons. The first one is that React is in high demand in the software development job market and has been for a few years. If you learn to code in React and can do it well, you will increase your chances of finding a job. This alone is another reason it is worth learning.

Top React Courses Online - Updated [July 2021] | Udemy
React is one of the most popular JavaScript libraries for building user interfaces. If you want to become a front-end developer or find a web development job, you would probably benefit from learning React in-depth. In this post, you're going to learn some of the basics of React like creating a component, the JSX syntax, and Props.

React Functional Components, Props, and JSX – React.js
...

Component-based development is today's popular way for building User Interfaces and Web applications. Regardless of which modern framework you use, Angular, Vue or React, they are all component-based.Therefore, understanding how to use components efficiently will help you to become a better Web Developer and to build better React applications.

React JS — Understanding Functional & Class Components

...

Here, ShoppingList is a React component class, or React component type. A component takes in parameters, called props (short for "properties"), and returns a hierarchy of views to display via the render method. The render method returns a description of what you want to see on the screen. React takes the description and displays the result.

Tutorial: Intro to React – React

Functional components lack a significant amount of features as compared to class-based components.The gap is made up with the help of a special ReactJS concept called "hooks".Hooks are special functions that allow ReactJS features to be used in functional components.. Functional components do not have access to dedicated state variables like class-based components.

14 Best React JS Tutorials and Courses - [2021 Edition]

There's one aspect of JavaScript that always has me pulling my hair: closures.I work with React a lot, and the overlap there is

that they can sometimes be the cause of stale props and state.We'll get into exactly what that means, but the trouble is that the data we use to build our UI can be totally wrong in unexpected ways, which is, you know, bad.
