A trapezium is a 2d shape and a type of quadrilateral, which has only two parallel sides and the other two sides are non-parallel. In Euclidean Geometry, a quadrilateral is defined as a polygon with four sides and four vertices. Quadrilaterals are either simple or complex. The simple quadrilaterals are not self-intersecting and it is categorised as a convex or concave quadrilateral.

I explored a variety of subjects and transferred internally mid-way through my undergraduate career to focus on a business degree at Wharton, with a computer science minor. The school emphasizes pre-professionalism, providing many resources for corporate career development but also placing a lot of pressure on the student body.
