Data Manipulation. To manipulate Oracle data you can include DML operations, such as INSERT, UPDATE, and DELETE statements, directly in PL/SQL programs, without any special notation, as shown in Example 6-1. You can also include the SQL COMMIT statement directly in a PL/SQL program; see "Overview of Transaction Processing in PL/SQL". See also COMMIT in the Oracle Database SQL Reference.

In many cases you do not care then some fast SQL is executed 50% slower because of the queueing theory because you spent more on the sending SQL from for example Forms to Oracle. For batch processes you want to be 100% :) Probably my rule is that 90-100% is great while everybody are

happy.
