Motorguide electric motors are used on various types of vessels - inflatable rubber and PVC boats, aluminum, plastic boats and multi-seat boats. Motorguide are designed to operate in both freshwater and seawater, they are excellent for ponds with the prohibition of the use of gasoline engines, and for trolling - trolling.

motor in a raised position, loosen the steering tension knob and raise the motor the full length of the column, then push the Quick Stow lever up into the lock position. Leave the lever unlocked while operating the motor. The Quick Stow device is designed to be stiff to ensure extended life without slipping.

Manuals Trolling

Every fisherman uses a

trolling motor to maneuver their boat through the water so quietly so as not to disturb schools of fish.

Trolling motors are generally not the boat's primary motor, but are secured to the bow or stern when needed and easily removed and stored when not. Most trolls are submersible and their parts can take a
