The definition of symbiosis was a matter of debate for 130 years. In 1877, Albert Bernhard Frank used the term symbiosis to describe the mutualistic relationship in lichens. In 1878, the German mycologist Heinrich Anton de Bary defined it as "the living together of unlike organisms". The definition has varied among scientists, with some advocating that it should only refer to persistent ...

La célula (del latín cellula, diminutivo de cella, 'celda') [1] es la unidad morfológica y funcional de todo ser vivo.De hecho, la célula es el elemento de menor tamaño que puede considerarse vivo. [2] De este modo, puede clasificarse a los organismos vivos según el número de células que posean: si solo tienen una, se les denomina unicelulares (como pueden ser los protozoos o las ...

Instead, a DuckDuckGo search reveals it was picked up by ZERO mainstream media outlets and Big Tech tyrants will suspend people who post it, as political strategist Steve Cortes learned the hard way when he posted a Tweet that went against the face mask narrative. The Tweet itself featured a quote and a link that prompted Twitter to suspend his account, potentially indefinitely.
