Abstract This paper aims to provide an overview of a narrative psychological approach towards the study of self and identity. The narrative psychological approach can be classified as broadly social constructionist insofar as it attempts to examine the cultural structuration of individual experience.

Narrative Psychology, Trauma and the Study of Self/Identity

Narrative identity is a special kind of story—a story about how I came to be the person I am becoming. With this special status comes the special function, a function that Erikson (1963) assigned to identity itself. It is the function of integration.

Narrative Identity: What Is It? What Does It Do? How Do ...

Narrative psychology is a perspective within psychology concerned with the "storied nature of human conduct", that is, how human beings deal with experience by observing stories and listening to the stories of others. Operating under the assumption that human activity and experience are filled with "meaning" and stories, rather than logical arguments or lawful formulations, narrative ...
