Noise manual Noise measurement manual—ESR/2016/2195 (formerly EM1107) (PDF, 559.4KB) Noise monitoring is undertaken by the Queensland Government for a variety of reasons; including the provision of information to government for policy and investment decision-making, to underpin environment management decisions by government and industry, and to assess impacts on the

community and environment.

Guidelines and manuals | Environment | Department of ...

Measuring noise levels and workers' noise exposures is the most important part of a workplace hearing conservation and noise control program. It helps identify work locations where there are noise problems, employees who may be exposed to noise levels that can cause hearing loss, and where additional noise measurements need to be made. This information also helps determine appropriate noise ...

Noise - Measurement of Workplace Noise : OSH Answers

Noise measurements collected by CSHOs cannot be used as a basis for citations unless they are obtained using equipment that has a current (within the past 12 months) periodic calibration certificate on file and that has received documented calibration before and after the measurements were made using accepted practices for documentation, as outlined in the OSHA Field Operations Manual.
