Noninfectious Diseases Of Wildlife - VRC Works

Animal disease - Animal disease - Survey of animal diseases: Diseases may be either infectious or noninfectious. The term infection, as observed earlier, implies an interaction between two living organisms, called the host and the parasite. Infection is a type of parasitism, which may be defined as the state of existence of one organism (the parasite) at the expense of another (the host).

Animal disease - Survey of animal diseases | Britannica

Capture myopathy (CM) is a non-infectious disease of wild and domestic animals in which muscle damage results from extreme exertion, struggle, or stress. CM often occurs as a result of chemical immobilization, capture, or transport, but can also be the result of other natural causes of stress.
