Build a sequence of numbers in the following fashion. Let the first two numbers of the sequence be 1 and let the third number be $1 + 1 = 2$. The fourth number in the sequence will be $1 + 2 = 3$ and the fifth number is $2 + 3 = 5$. To continue the sequence, we look for the previous two terms and add them together. So the first ten terms of the ...

For understanding and using Sequence and Series formulas, we should know what Sequence and series are. What is the Sequence? An ordered list of numbers which is defined for positive integers. Example: (1,2,3,4) What is a series? It is the sum of the terms of the sequence and not just the list. Example ($1 + 2 + 3 + 4 = 10$) Arithmetic Sequence. $t_n \dots$
