Nursing Assessment Mosby 6th Edition

Education about safe pain management will help prevent undertreatment of pain and the resulting harmful effects. Safety includes the use of appropriate tools for assessing pain in cognitively intact adults and cognitively impaired adults. Otherwise pain may be unrecognized or underestimated. Use of analgesics, particularly opioids, is the foundation of treatment for most types of pain.

The R-L-T Model of Nursing offers a framework for holistically assessing a patient while developing a plan of care. The 12 activities of living can serve as a systematic process to assess a patient requiring complex care. In one study, the 12 activities of living were used to comprehensively assess the long-term care needs of neurologically impaired patients with an artificial airway requiring ...

Biography of Ida Jean Orlando. Ida Jean Orlando-Pelletier (August 12, 1926 - November 28, 2007) was an internationally known psychiatric health nurse, theorist, and researcher who developed the "Deliberative Nursing Process Theory." Her theory allows nurses to create an effective nursing care plan that can also be easily adapted when and if any complications arise with the patient.
